RESEARCH INTERESTS

My current research focuses on developing principled approaches for building scalable and reliable learning systems. I aim to study how modularity, representation alignment, and functional consistency can be optimized to make large models more adaptable and interpretable. I am also open to diversifying my research to various aspects in the future.

EDUCATION

Bachelor of Data Science and Artificial Intelligence, 2020 - 2024
Hanoi University of Science and Technology – ***Valedictorian***
Cumulative GPA: 4.0/4.0 – *Highest GPA achieved in the school's 65-year history.*
High school degree, Bac Ninh Specialized High school 2017 - 2020
Major in Mathematics

RESEARCH EXPERIENCE

AI Research Resident Apr 2024 - Now
FPT Software AI Center *Hanoi, VietNam*
Advisors: Prof. Thieu Vo and Prof. Tan Nguyen

- Exploring the fundamentals of Transformers and their connections to other fields. Our research investigates the dynamics of tokens within self-attention blocks and leverages these insights to design new self-attention mechanisms with improved performance.
- Developing Metanetworks — models capable of processing the weights of other neural networks. Our research examines the functional equivalence of neural network weight spaces and introduces novel equivariant architectures to effectively operate on these spaces.

Research Member Sep 2022 - Jul 2024
Data Science Laboratory *BKAI, HUST*
Advisor: Dr. Linh Ngo Van

- Work in Continual Learning research team. Our research improve prompt-based methods in Continual Learning by exploring its connection to Mixture of Experts models, leading to faster convergence and better performance.

PREPRINTS

(*) denotes equal contributions.

1. Anonymous. Quasi-Equivariant Metanetworks. Under Review.
2. Anonymous. Equivariant Metanetworks for Mixture-of-Experts Weights. Under Review.

AWARDS

- Scholarship for Students with Excellent Academic Records (6 semesters) - Hanoi University of Science and Technology
- Valedictorian certificate - Hanoi University of Science and Technology
- Outstanding valedictorians graduating from universities and academies in Hanoi in 2024
- Rising AI Pioneer 2024 - FPT Software AI Center

SKILLS

Programming	Python, Java
Technical	Math, Statistics, Machine Learning
Libraries	Numpy, Pandas, Pytorch, Scikit-learn

LANGUAGE

Vietnamese	Native
English	Advanced (IELTS 7.5)

PROFESSIONAL SERVICES

- **Reviewer**: NeurIPS 2025, ICLR 2026.
- **Program Committee**: AAAI 2026.
